INTRODUCTION

Local emergency services will always have to prioritize those in greatest needs during an emergency, especially where life is in danger. There will be times when you may be affected by an emergency but your life is not in immediate danger. During this time, individuals and communities may need to rely on their own resources to ensure they are able to cope with the consequences of the emergency. Many communities already spontaneously help each other in times of need, but previous experience has shown that those who have spent time planning and preparing for emergencies are better able to cope, and recover more quickly.

Tattenhall and District Parish Council will have an important role in both the response to and recovery from an emergency. It will be able to act faster than many of the responding organizations and have an in-depth local knowledge that will be invaluable. Tattenhall's plan will put arrangements in place to mobilize resources that are already in our community to support residents during an emergency. This plan sits below the local authority's plan. During a major emergency or incident Tattenhall's advanced planning will provide key assistance coordinating local response activities.

AIMS

The aim of this community plan is to increase the short term resilience in the event of an emergency occurring in the Tattenhall and District Area.

OBJECTIVES

- To enable the community to respond to an emergency that occurs in, or very close to, the parish of Tattenhall and District.
- To identify resources within the community that can assist the emergency services and CW&C in the response to an emergency.
- To identify and compile a list prior to the incident of key contacts within and outside the community who can assist in response to an emergency.
- To identify hazards and possible mitigation measures within the community.
- To identify the vulnerable and those made vulnerable by a major incident. To compile a plan to deal with the problem.
