

**Artists Of Tattenhall** is a very newly created group of Tattenhall residents with an interest in creativity in the village. We have come together to create an Art Trail which will be seen in various venues throughout the village in Autumn 2023.

The trail will be on for a month and then the art included will be returned to the contributing artist.

We have been really pleased with the uptake of venues, with 69 spaces confirming their interest thus far.

**The youth shelter could be used within the trail.**

We would be happy to use the trail as a way of piloting art work ideas for the shelter and gathering the views of young people regarding their space. We would hang boards created by local artists. A further board would explain that the art works are there temporarily but that they could be permanent or replaced with other artistic ideas inspired by or in contrast to the work. The artists involved would accept that this is a different environment for art as its public and outdoors and would be willing to take this risk. All those involved are volunteering their time for free and at present the project has no funding pot. A donation towards materials needed would be really helpful but isn't necessary as we feel that we can generate a pool of donated materials if we need to.

We already have a list of confirmed venues but are open to adding in venues who **confirm before the 24<sup>th</sup> July.**
