

Hi Ann

Thank you for your patience whilst this has been investigated.

Please see the attached documents; 'Chester Road, Tattenhall – Option 1' highlights a proposal that was provided to the Parish Council back in 2018. The Local Member and Parish Council did not support option 1 at the time due to concerns it would negatively impact residents needing to park. Therefore, these restrictions were omitted, and the restrictions shown on plan 'DQ58A' were implemented.

We would consider the PC's request to install restrictions here, but it would need be to the extent shown on in red on the option 1 plan, rather than the singular restriction on one side of the road proposed by the PC.

Please let me know your comments on this.

Additionally, I have been passed enquiry ref: HW845516041 with regards to the installation a barrier on Chester Road next to FP6. Cheshire West and Chester Council have moved away from installing guardrails on low-speed roads, and in some areas, existing provisions are being removed . Studies by the Department for Transport have found that 'serious injury accidents' fell significantly at locations where guardrails had been removed. The study found drivers would slow down and were less likely to drive with 'tunnel vision' when railings were removed from pavements. In addition to this, barriers can cause pedestrians to become trapped in the event of accidents.

Therefore, we would not consider installing measures at this location.

I trust the above is of some assistance.

Regards

Nick Edwards
